CEO's Message

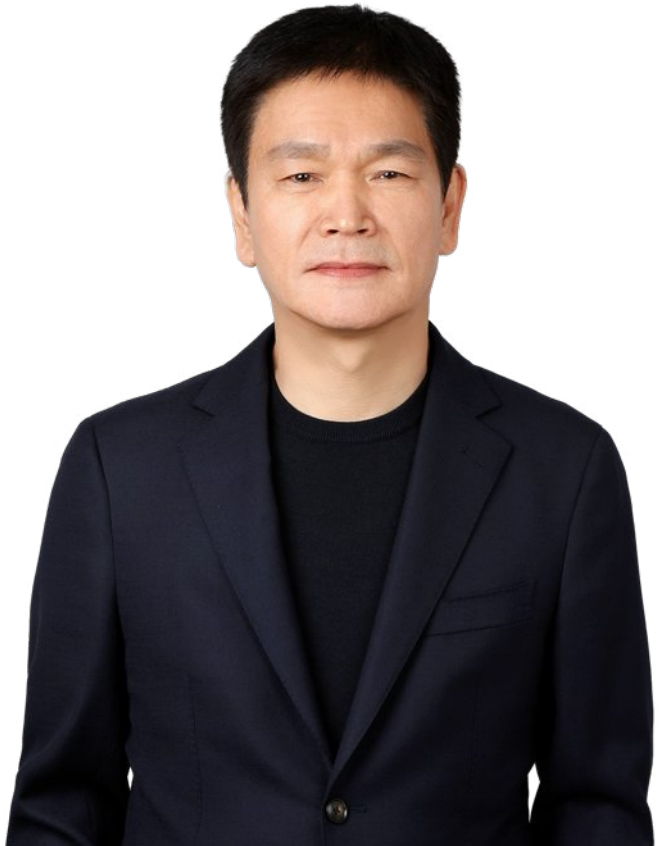

Since its establishment in 1990, FOODWARE has been producing more than 180 types of dumplings (based on registered products) at home & abroad.

This has been achieved through continuous facility investment & quality improvement & the company is leading the popularisation of safe & high-quality dumplings. In order to provide consumers with healthy & safe food, The company produces products in accordance with strict international food hygiene standards such as HACCP certification, ISO22000 certification & FSSC22000 certification & in 2014, it was designated as the first Pork processing heat treatment plant in Japan by the Ministry of Health, Labour & Welfare in Korea. In addition, as of 2021, we are making great efforts to pioneer the K-FOOD market, achieving an export performance of approximately 14 billion won (including OEM & ODM) in six countries.

The company's commitment to stringent quality control, carefully selected ingredients & meticulous hygiene management has earned it recognition for its products. It has supplied dumplings to over 25 companies, franchises & restaurants, including CJ CheilJedang, Dongwon F&B, Hong Jin Kyung & The Bon Korea, with sales exceeding 100 billion won (as of 2021). The company has maintained its commitment to continuous quality control & investment in automated hygiene facilities, leading to the launch of the food service ingredient brand ‘Damdumandoo', offering a range of customised dumplings.Building on these achievements, the B2C brand ‘heymeal' was launched in 2022.FOODWARE is exp&ing its production capabilities to develop a variety of products & plans to exp& its business worldwide to secure future growth engines.

As a food company with a 30-year focus on the essence of food, FOODWARE is committed to working together to create a healthy & sustainable food culture for the future.

Dong-sik Shin, CEO

The largest single-item dumpling producer in South Korea

FOODWARE is the largest single-item dumpling manufacturer in Korea with a manufacturing facility area of 29,069㎡ (8,500 pyeong). Since its establishment in 1990, it has grown into the largest OEM/ODM food manufacturing company in Korea, producing an average of 25,000 tons* of dumplings annually. In addition, it was the first company in Korea to be designated as a heat treatment plant for processed Pork by the Japanese Ministry of Health, Labour & Welfare (2014), and has been striving to pioneer the K-FOOD market, achieving export sales of approximately 25.3 billion won (including OEM & ODM) to eight countries, including Japan, as of 2024.
